ACKNOWLEDGEMENTS

This report is a product of the NM Youth Risk and Resiliency Survey (YRRS), a project that characterizes risk behaviors and resiliency/protective factors among New Mexico youth. The YRRS is a joint project of the New Mexico Department of Health (NMDOH) and the New Mexico Public Education Department (PED), with support and technical assistance from the University of New Mexico Prevention Research Center (UNM PRC); the Office of Substance Abuse Prevention, Behavioral Health Services Division (OSAP-BHSD); the Albuquerque Area Southwest Tribal Epidemiology Center (AASTEC); and the Division of Adolescent and School Health, Centers for Disease Control and Prevention (CDC-DASH). Gratitude is extended to the individuals listed below for their contribution toward developing and producing this report. (Individuals who served on the NM-YRRS 2013 Steering Committee are identified by an asterisk (*).)

For a discussion of statistical significance, see Appendix B: About this Report
The response rate for Eddy County was 78%.

A high response rate produces survey results that are more representative of the student population. A response rate of at least 60% allows generalization of results to the entire student body. A response rate of 70% is excellent and allows a high degree of confidence in results. Response rates below 60% are considered low, and caution should be exercised in interpreting results. Low response rates indicate that the data may represent only students who participated in the survey and not necessarily the entire student body.

Appendix B
About this Report
Appendix B: About this Report

This report contains county level results from the 2013 New Mexico Middle School Youth Risk and Resiliency Survey (YRRS). The YRRS is a statewide survey of public school students in middle schools and high schools throughout New Mexico. Statewide and county level results are available at

www.YouthRisk.org, and

nmhealth.org/go/youth.

School district reports are available only with permission from the appropriate school district superintendent. Forms for this are permission are available under the "Requesting Data" link on the youthrisk.org site. Together, these documents comprise a useful tool for those working on youth-related issues at the state and local level.

Using the Report

The YRRS is organized into two major content areas: risk behaviors and protective (resiliency) factors. Risk behaviors include behaviors associated with unintentional injury, violence, mental health, tobacco use, alcohol use, drug use, sexual activity, physical activity, and nutrition. Protective or resiliency factors are measures of the positive and supportive relationships, experiences, activities, resources and values that encourage healthy youth development. Resiliency factors and related traits include caring and supportive relationships in the family, school, community and with peers; boundaries set by the family and school; positive peer support; meaningful participation and constructive use of time in school and outside of school.

The main section of this report consists of a module of results for each main topic area of the YRRS. Each module starts with a set of line charts illustrating change in behavior over the years of the survey (for counties or school districts that only have one recent year of data, the line charts are omitted). The line charts are followed by one or more sets of three bar charts. The first bar chart in each set compares the county prevalence of a group of behaviors to the NM prevalence for the same behaviors; the second compares the county prevalence for girls to that of boys for the same behaviors, and the third compares the county prevalence for each grade level.

Following the section on distinct risk and resiliency factors is a section that illustrates the relationship between risk behaviors and protective factors. This section consists of a set of bar charts, each showing the prevalence of a particular risk behavior for students with varying levels of selected protective factors.

In some cases with very few students in a particular age or gender group, data have been suppressed to protect the anonymity of the individual respondents. Suppressed data are marked with "--". In cases where there are fewer than 50 respondents per grade level or gender, grade level or gender charts have been omitted.
Understanding the Charts - and A Word about Error Bars

The bar charts in this report present the percentage of students who reported engaging in any given risk behavior or who reported having any given protective factor. The height of the bars conveys the percentage of students reporting each trait, and provides a quick visual comparison between different groups of students reporting that trait. A label for each bar presents the actual percentage of students who reported each trait. For instance, the chart on page 17, Unintentional Injury, shows that 5.7% of students in New Mexico rarely or never wore seatbelts, while 7.3% of students in Eddy County rarely or never wore seatbelts.

Because of the high cost and logistical complications involved in conducting a statewide survey, the YRRS was administered to a sample of students, rather than to every single student in each school district. Because YRRS data are from a sample of students, and not the entire student body, the results in this report are estimates. As with all estimates, there is some uncertainty associated with each of these results. On the charts in this report, this degree of uncertainty is represented by an error bar (or confidence interval). The error bar is the thin ‘I’ shaped line that extends above and below the end of each bar in a chart. One of the major influences on the size of the confidence interval or error bar is the number of participants in the survey. In general, this means that with more students participating in the survey, there will be a higher degree of confidence in the results (i.e., error bars will be smaller).

The proper interpretation of an error bar can be illustrated by looking at the chart below. This chart compares the New Mexico high school prevalence of cigarette smoking and cocaine use to the United States prevalence for 2013. The chart shows that the prevalence of current cigarette smoking was 14.4% for New Mexico and 15.7% for the United States. The error bar for the estimate of current smoking among New Mexico students extends a little more than 2 percentage points in either direction, from 12.2% to 16.8%. This means that we are confident that the actual percentage of smokers in this group of students was between 12.2% and 16.8%. The error bar for the estimate of current smoking in the US also extends more than 2 percentage points in either direction, so we are confident that the actual percentage of smokers among this group was between 13.5% and 18.1%.

![Current Cigarette Smoking and Ever Used Cocaine Grades 9-12, NM & US, 2013](chart.png)
How does knowing the upper and lower limits of our error bars help us? While it appears at first glance that New Mexico has a lower prevalence of smoking than the United States (14.4% vs. 15.7%), a closer look at the error bars shows a more complicated picture. The error bars for the New Mexico estimate (12.2%–16.8%) and the US estimate (13.5%-18.1%) overlap. Because of this overlap, we do not have a high degree of confidence that the prevalence of smoking in New Mexico was actually different from the prevalence in the United States. In other words, the difference between the prevalence of smoking in New Mexico and the United States was not statistically significant.

For cocaine use it appears that New Mexico had a higher prevalence than the United States (10.3% vs. 5.5%). The error bar for New Mexico extends from 8.1% to 13.0%, and the error bar for the United States extends from 4.7% to 6.6%. Because the higher bound of the US error bar (6.6%) is lower than the lower bound of the NM error bar (8.1%), these error bars do not overlap. For cocaine use, we are confident in saying that the New Mexico prevalence was higher than the US prevalence. In other words, the difference between the prevalence of cocaine use in New Mexico and the United States was a statistically significant difference.

For some small school districts, error bars have been removed from this report. With small populations, the number of students sampled can approach the total student population. In these cases, error bars would have limited meaning because with a high percentage of students surveyed, there is less uncertainty around the estimates than error bars suggest.
Risk Behavior and Resiliency/Protective Factor Definitions

Personal Safety (Injury, Violence, and Bullying)

Rarely or never wore a bike helmet
Of those who rode a bicycle, answered ‘Never’ or ‘Rarely’ to the question, *When you ride a bicycle, how often do you wear a helmet?*

Rarely or never wore a seatbelt
Answered ‘Never’ or ‘Rarely’ to the question, *How often do you wear a seat belt when riding in a car?*

Ever carried a weapon
Answered ‘Yes’ to the question, *Have you ever carried a weapon, such as a gun, knife, or club?*

Ever been in a physical fight
Answered ‘Yes’ to the question, *Have you ever been in a physical fight?*

Ever bullied on school property
Answered ‘Yes’ to the question, *Have you ever been bullied on school property?*

Ever bullied electronically
Answered ‘Yes’ to the question, *Have you ever been electronically bullied? (Include being bullied through e-mail, chat rooms, instant messaging, Web sites, or texting.)*

Mental Health

Ever seriously thought about killing self
Answered ‘Yes’ to the question, *Have you ever seriously thought about killing yourself?*

Ever planned to kill self
Answered ‘Yes’ to the question, *Have you ever made a plan about how you would kill yourself?*

Ever tried to kill self
Answered ‘Yes’ to the question, *Have you ever tried to kill yourself?*

Tobacco Use

Ever smoked cigarettes
Answered ‘Yes’ to the question, *Have you ever tried cigarette smoking, even one or two puffs?*

First smoked a cigarette before age 11
Answered ‘10 years old’ or younger to the question, *How old were you when you smoked a whole cigarette for the first time?*

Smoked at least one whole cigarette in life
Answered ‘1 cigarette’ or more to the question, *About how many cigarettes have you smoked in your entire life?*

Current cigarette smoking (Smoked cigarettes at least once in the past 30 days)
Answered ‘1 or 2 days’ or more to the question, *During the past 30 days, on how many days did you smoke cigarettes?*

Non-smoker
Answered ‘0 days’ to the question, *During the past 30 days, on how many days did you smoke cigarettes?*

Frequent cigarette smoking
Answered ‘20 to 29 days’ or more to the question, *During the past 30 days, on how many days did you smoke cigarettes?*
Smoked on school property
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days did you smoke cigarettes on school property?

Of those who smoked in the past 12 months, tried to quit smoking
  Answered 'Yes' to the question, During the past 12 months, did you ever try to quit smoking cigarettes?, among those who answered 'Yes' or 'No' to the

Successful quit attempt by one who smoked in the past 12 months
  Answered 'Yes' to the question, During the past 12 months, did you ever try to quit smoking cigarettes?
  - and -
  Answered '0 days' to the question, During the past 30 days, on how many days did you smoke cigarettes? (i.e., were currently non-smokers.)

Unsuccessful quit attempt by one who smoked in the past 12 months
  Answered 'Yes' to the question, During the past 12 months, did you ever try to quit smoking cigarettes?
  - and -
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days did you smoke cigarettes? (i.e., were current smokers.)

Current cigar smoking
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days did you smoke cigars, cigarillos, or little cigars?

Current spit tobacco use
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days did you use chewing tobacco, snuff, or dip, such as Redman,

Exposed to second hand cigarette smoke
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days were you in the same room with someone who was smoking cigarettes?

Alcohol Use
Ever drank alcohol
  Answered 'Yes' to the question, Have you ever had a drink of alcohol, other than a few sips?

Drank alcohol before age 11
  Answered '10 years old' or younger to the question, How old were you when you had your first drink of alcohol other than a few sips?

Current drinking
  Answered '1 or 2 days' or more to the question, During the past 30 days, on how many days did you have at least one drink of alcohol?

Binge drinking (Had 5 or more drinks on a single occasion at least once in the past 30 days)
  Answered '1 day' or more to the question, During the past 30 days, on how many days did you have 5 or more drinks of alcohol in a row, that is, within

It would be very easy or sort of easy to get alcohol
  Answered 'Very easy' or 'Sort of easy' to the question, If you wanted to get some beer, wine, or hard liquor (for example, vodka, whiskey, or gin),

My parents think my regular alcohol use would be wrong
  Answered 'Very wrong' or 'Wrong' to the question, How wrong do your parents feel it would be for you to drink alcohol (beer, wine, or hard liquor) regularly?
I think regular alcohol use by people my age is very wrong
   Answered 'Very wrong' or 'Wrong' to the question, How wrong do you think it
   is for someone your age to drink alcohol (beer, wine, or hard liquor) regularly?

People face great risk from daily alcohol use
   Answered great risk to the question, How much do you think people risk
   harming themselves (physically or in other ways) if they have one or two

Ever rode in a car with a drinking driver
   Answered 'Yes' to the question, Have you ever ridden in a car driven by someone who
   had been drinking alcohol?

Drug use

Ever used marijuana
   Answered 'Yes' to the question, Have you ever used marijuana?

First used marijuana before age 11
   Answered '10 years old' or younger to the question, How old were you when
   you tried marijuana for the first time?

Current marijuana use
   Answered '1 or 2 times' or more to the question, During the past 30 days,
   how many times did you use marijuana?

Ever used a prescription drug without a doctor's prescription
   Answered 'Yes' to the question, Have you ever taken a prescription drug
   (such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax)
   without a doctor's prescription?

Ever used a painkiller to get high
   Answered 'Yes' to the question, Have you ever used a pain killer to get high, like
   Vicodin, OxyContin (also called Oxy or OC), or Percocet (also called Percs)?

Ever used cocaine
   Answered 'Yes' to the question, Have you ever used any form of cocaine,
   including powder, crack, or freebase?

Ever used inhalants
   Answered 'Yes' to the question, Have you ever sniffed glue, or breathed the
   contents of spray cans, or inhaled any paints or sprays to get high?

Ever used illegal injection drugs
   Answered 'Yes' to the question, Have you ever used a needle to inject any
   illegal drug into your body?

Sexual Activity

Ever had sexual intercourse
   Answered 'Yes' to the question, Have you ever had sexual intercourse?

Had sexual intercourse before age 11
   Answered '10 years old' or younger to the question, How old were you when
   you had sexual intercourse for the first time?

Had sexual intercourse with three or more people in lifetime
   Answered '3 people' or more to the question, With how many people have
   you ever had sexual intercourse?

Used a condom (among those who ever had sexual intercourse)
   Answered 'Yes' to the question, The last time you had sexual intercourse,
   did you or your partner use a condom?
     - among those who
   Answered 'Yes' to the question, Have you ever had sexual intercourse?
Taught about HIV/AIDS
Answered 'Yes' to the question, Have you ever been taught about AIDS or HIV infection in school?

Body Weight and Weight Control
Self-described as slightly or very overweight
Answered 'Very overweight' or 'Slightly overweight' to the question, How do you describe your weight?

Trying to lose weight
Answered 'Lose weight' to the question, Which of the following are you trying to do about your weight?

Ever fasted to lose weight
Answered 'Yes' to the question, Have you ever gone without eating for 24 hours or more (also called fasting) to lose weight or to keep from gaining weight?

Ever vomited or used laxatives to lose weight
Answered 'Yes' to the question, Have you ever vomited or taken laxatives to lose weight or to keep from gaining weight?

Physical Activity
No physical activity in the past week
Answered '0 days' to the question, During the past 7 days, on how many days were you physically active for a total of at least 60 minutes per day? (Add up all the time you spend in any kind of physical activity that increases your heart rate and makes you breathe hard some of the time.)

Physically active five days per week
Answered '5 days' or more to the question, During the past 7 days, on how many days were you physically active for a total of at least 60 minutes per day? (Add up all the time you spend in any kind of physical activity that increases your heart rate and makes you breathe hard some of the time.)

Daily physical activity
Answered '7 days' to the question, During the past 7 days, on how many days were you physically active for a total of at least 60 minutes per day? (Add up all the time you spend in any kind of physical activity that increases your heart rate and makes you breathe hard some of the time.)

At least one day/week of physical education
Answered '1 day' or more to the question, In an average week when you are in school, on how many days do you go to physical education (PE) classes?

Daily physical education at school
Answered '5 days' to the question, In an average week when you are in school, on how many days do you go to physical education (PE) classes?

Resiliency/Protective Factors
Gets mostly A's in school
Answered 'Mostly A's' to the question, During the past 12 months, how would you describe your grades in school?

Unless otherwise noted, responses to other resiliency/protective factor questions refer to respondents who answered "Pretty much true" or "Very much true" to the questionnaire item indicated.
