ACKNOWLEDGEMENTS

The production of this report was made possible by collaboration between the New Mexico Department of Health (NMDOH), and the New Mexico Public Education Department (NMPED), with technical support from the University of New Mexico Prevention Research Center (UNM PRC) and the Division of Adolescent and School Health, Centers for Disease Control and Prevention (CDC-DASH). Gratitude is extended to the individuals listed below for their contribution toward developing and producing this report.

New Mexico Public Education Department
   Susanna M. Murphy, Ph.D., Secretary of Education
   Sheila Hyde, Ph.D., Deputy Secretary, Learning and Accountability
   Kristine M. Meurer, Ph.D., Acting Assistant Secretary, Student Success Division *
   William O. Blair, Ph.D., Assistant Director, School and Family Support Bureau *
   Dean Hopper, M.A.Ed., Assistant Director, School and Family Support Bureau
   Lonnie Barraza, M.S.Ed, HIV Program Administrator *

Appendix A 129
Introduction

This report contains county level middle school results from the 2009 New Mexico Middle School Youth Risk and Resiliency Survey (YRRS), a statewide survey of public school students, grades 6 - 8. Statewide and county level results will be available at www.YouthRisk.org and www.health.state.nm.us/ERD/HealthData/yrrs.shtml. Together, these documents comprise a useful tool for those working on youth-related issues at the state and local level.

The YRRS is organized into two major content areas: risk behaviors and protective (resiliency) factors. Risk behaviors include behaviors associated with unintentional injury, violence, sadness and suicidal ideation, tobacco use, alcohol use, drug use, sexual activity, physical activity, and nutrition. Protective or resiliency factors are measures of the positive and supportive relationships, experiences, activities, resources and values that encourage healthy youth development. Resiliency factors and related traits include caring and supportive relationships in the family, school, community and with peers; boundaries set by the family and school; positive peer support; meaningful participation and constructive use of time in school and outside of school; and others (Appendix B).

Additionally, this report includes a section on academic measures and traits. These academic measures include getting good grades (mostly A's and B's), trying hard to do good work in school, planning to go to college, skipping or ditching school, coming to class with paper and something to write with, and completing homework.

How to Read this Report

This report has three main sections, each of which consists of a set of bar and line charts. The first section presents the results of the major risk behaviors examined in the survey. Each category of risk behavior is presented with several data charts. At the beginning of each topic area, a set of line charts gives results for multiple survey years of the YRRS (2003, 2005, 2007, and 2009). A following set of bar charts compares results for the county to results for the entire state, compares the behaviors of boys to those of girls, and makes comparisons between grade levels within the county.

The second section presents results for the academic measures and behaviors. As with the risk behaviors, there are line and bar charts presenting trends, a comparison between the state and the county, a comparison between boys and girls in the county, and a comparison of grade levels within the county. Using the same styles of charts, the third section of the report presents results for the resiliency/protective factors.

In some cases when there were very few students in a particular age or gender group, data have been suppressed to protect the anonymity of the individual respondents.

---------------------------------------------------------------------------------------------------------------------------------

NOTE: County level YRRS reports are freely available. School district reports have been distributed to school district offices. School districts are encouraged to reproduce and share these reports with community groups concerned with prevention and health promotion. However, school district level results will not be released without express permission of the school district superintendent. Forms for requesting school district data are available at www.YouthRisk.org.
Understanding the Charts - and A Word about Error Bars

The bar charts in this report present the percentage of students who reported engaging in any given risk behavior or who reported having any given protective factor. The height of the bars conveys the percentage of students reporting each trait, and provides a quick visual comparison between different groups of students reporting that trait. A label for each bar presents the actual percentage of students who reported each trait. For instance, the chart on page 17, Personal Safety: Injury, shows that 7.2% of students in New Mexico rarely or never wore seatbelts, while 9.7% of students in Cibola County rarely or never wore seatbelts.

Because of the high cost and logistical complications involved in conducting a statewide survey, the YRRS was administered to a sample of students, rather than to every single student in each school district. Because YRRS data are from a sample of students, and not the entire student body, the results in this report are estimates. As with all estimates, there is some uncertainty associated with each of these estimates. On the charts in this report, this degree of uncertainty is represented by an error bar (or confidence interval). The error bar is the thin 'I' shaped line that extends above and below the end of each bar in a chart. One of the major influences on the size of the confidence interval or error bar is the number of participants in the survey. In general, this means that with more students participating in the survey, there will be a higher degree of confidence in the results (i.e., error bars will be smaller).

The proper interpretation of an error bar can be illustrated by looking at the chart below. This chart compares the New Mexico prevalence of smoking and cocaine use to the United States prevalence for 2005, a previous survey year. The chart shows that the prevalence of current smoking was 25.7% in New Mexico and 23.0% in the United States. The error bar for the estimate of current smoking among New Mexico students extends approximately 4 percentage points in either direction, from 22.0% to 29.8%. This means that we are confident that the actual percentage of smokers in this group of students was between 22.0% and 29.8%. The error bar for the estimate current smoking in the US extends approximately 2.5 percentage points in either direction, from 20.7 to 25.3%. We are confident that the actual percentage of smokers among this group was between 20.7% and 25.3%.

Current Smoking and Current Cocaine Use

<td>7.9</td>
<td>25.7</td>
</tr>
<tr>
<td>US</td>
<td>3.4</td>
<td>23.0</td>
</tr>
</tbody>
</table>
How does knowing the upper and lower limits of our error bars help us? While it appears at first glance that New Mexico had a higher prevalence of smoking than the United States (25.7% vs. 23.0%), a closer look at the error bars shows a more complicated picture. The error bars for the New Mexico estimate (22.0% - 29.8%) and the US estimate (20.7% - 25.3%) overlap. Because of this overlap, we do not have a high degree of confidence that the prevalence of smoking in New Mexico is actually different from the prevalence in the United States. In other words, the difference between the prevalence of smoking in New Mexico and the United States is not statistically significant.

For cocaine use it also appears that in 2005, New Mexico had a higher prevalence than the United States (7.9% vs. 3.4%). The error bar for New Mexico extends from 6.6% to 9.5%, and the error bar for the United States extends from 2.8% to 4.4%. Because the higher bound of the US error bar (4.4%) is lower than the lower bound of the NM error bar (6.6%), these error bars do not overlap. For cocaine use, we are confident in saying that the New Mexico prevalence was higher than the US prevalence. In other words, the difference between the 2005 prevalence of cocaine use in New Mexico and the United States was a statistically significant difference.

For some small counties, error bars have been removed from this report. With small populations, the number of students sampled can approach the total student population. In these cases, error bars would have limited meaning because with a high percentage of students surveyed, there is less uncertainty around the estimates than error bars suggest.
Methodology

The YRRS was implemented in the fall semester of the 2009-10 school year. All public school districts in New Mexico were invited to participate in the 2009 Middle School YRRS. Of 89 districts statewide, 74 districts participated. From each participating school district, schools with students from 6th to 8th grades were selected to participate.* The probability of selection of each school was proportional to the size of its 6th-8th grade population. In large school districts only some of the schools were selected to participate, while in small districts, all schools were selected. Classrooms were systematically selected from each school, and all students in each selected classroom were asked to participate.

In each participating school, a single day was arranged on which to administer the survey. Questionnaire forms and pencils were distributed to each student in participating classes, and students were asked to fill out the questionnaires independently of other students and without teacher assistance.

Questionnaires were electronically scanned, and data were analyzed using STATA 10.1, a statistical software program.

Limitations of the YRRS

All information from the YRRS was self-reported by the participating students. While most questions on the YRRS come from nationally validated surveys, and data quality has been demonstrated to be very high in national surveys, there is no way to guarantee the truthfulness of the participants in any survey that relies on self-reporting.

A good response rate is one of the most important goals in conducting a survey. At the school district level, a response rate is the percentage of all students selected for the survey who complete and return a useable questionnaire form. At the state level, the response rate incorporates the participation of school districts and schools as well as the participation of students. An adequate response rate means that survey results are more likely to represent the actual student population. The statewide response rate for the 2009 Middle School YRRS was 68%, an adequate response rate to represent the population.

In order to achieve a statewide response rate of 60% or greater, we aimed for a 75% response rate from each participating school district. Most participating school districts and counties met this target or were close to it. While the response rate was generally very good in participating schools, the overall response rate was driven down by the school districts that declined to participate.

* The High School YRRS was also conducted at the same time; results from that survey are published separately.
Participation in Cibola County

The response rate for Cibola County was 45%.

A high response rate produces survey results that are more representative of the student population. A response rate of at least 60% allows generalization of results to the entire student body. A response rate of 75% is excellent and allows a high degree of confidence in results. Because a high response rate means that more students have been surveyed, a high response rate will also be reflected in the error bars (i.e., with a higher response rate and more students included in the survey, error bars will be smaller and confidence intervals will be narrower). Response rates below 60% are considered low, and caution should be exercised in interpreting results. Low response rates indicate that the data may represent only students who participated in the survey and not necessarily the entire student body.

**Personal Information**

1. How old are you?  
   - A. 10 years old or younger: 0 (0.0%)
   - B. 11 years old: 22 (15.7%)
   - C. 12 years old: 35 (25.0%)
   - D. 13 years old: 44 (31.4%)
   - E. 14 years old: 35 (25.0%)
   - F. 15 years old: 4 (2.9%)
   - G. 16 years old or older: 0 (0.0%)

2. What is your sex?  
   - A. Female: 66 (47.1%)
   - B. Male: 74 (52.9%)

3. In what grade are you?  
   - A. 6th grade: 39 (27.9%)
   - B. 7th grade: 30 (21.4%)
   - C. 8th grade: 71 (50.7%)
   - D. Other: 0 (0.0%)

4. Are you Hispanic or Latino?  
   - A. Yes: 58 (58.6%)
   - B. No: 82 (58.6%)

5. What is your race? (Select one or more responses.)

   NOTE: Total may add up to more or less than 100% because respondents were allowed to choose multiple responses, and many students who identified Hispanic ethnicity on question 4 did not choose a response for race.

   - A. American Indian or Alaska Native: 68 (48.6%)
   - B. Asian: 5 (3.6%)
   - C. Black or African American: 4 (2.9%)
   - D. Native Hawaiian or Other Pacific Islander: 3 (2.1%)
   - E. White: 45 (32.1%)
6. During the past 12 months, how would you describe your grades in school?

Appendix A: Questionnaire

The next question asks about bullying. Bullying is when 1 or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again. It is not bullying when 2 students of about the same strength or power argue or fight or tease each other in a friendly way.

12. During the past 12 months, have you ever been bullied on school property? % (95% CI)
   A. Yes 26.7 (17.0 - 39.3)
   B. No 73.3 (60.7 - 83.0)

Sadness and Attempted Suicide
The next 3 questions ask about attempted suicide. Sometimes people feel so depressed about the future that they may consider attempting suicide or killing themselves.

13. Have you ever seriously thought about killing yourself?
   A. Yes 12.1 (7.7 - 18.6)
   B. No 87.9 (81.4 - 92.3)

14. Have you ever made a plan about how you would kill yourself?
   A. Yes 4.4 (2.3 - 8.3)
   B. No 95.6 (91.7 - 97.7)

15. Have you ever tried to kill yourself?
   A. Yes 3.8 (1.2 - 11.1)
   B. No 96.2 (88.9 - 98.8)

Tobacco Use
The next 17 questions ask about tobacco use.

16. Have you ever tried cigarette smoking, even one or two puffs?
   A. Yes 31.4 (19.9 - 45.8)
   B. No 68.6 (54.2 - 80.1)

17. How old were you when you smoked a whole cigarette for the first time?
   A. I have never smoked a whole cigarette 82.1 (68.9 - 90.4)
   B. 8 years old or younger 1.2 (0.3 - 4.3)
   C. 9 years old 1.7 (0.3 - 8.6)
   D. 10 years old 4.9 (1.6 - 14.1)
   E. 11 years old 3.3 (1.2 - 9.0)
   F. 12 years old 3.4 (1.4 - 7.7)
   G. 13 years old or older 3.5 (1.1 - 10.8)
18. About how many cigarettes have you smoked in your entire life?
   A. None 69.0 (53.5 - 81.2)
   B. 1 or more puffs but never a whole cigarette 11.6 (6.0 - 21.4)
   C. 1 cigarette 7.9 (3.8 - 15.7)
   D. 2 to 5 cigarettes 5.2 (2.4 - 10.8)
   E. 6 to 15 cigarettes (about ½ a pack total) 1.1 (0.2 - 6.4)
   F. 16 to 25 cigarettes (about 1 pack total) 0.2 (0.0 - 1.8)
   G. 26 to 99 cigarettes (more than 1 pack, but less than 5 packs) 1.4 (0.4 - 4.8)
   H. 100 or more cigarettes (5 or more packs) 0.2 (0.0 - 1.8)

19. During the past 30 days, on how many days did you smoke cigarettes?
   A. 0 days 92.6 (82.6 - 97.0)
   B. 1 or 2 days 2.3 (1.0 - 5.6)
   C. 3 to 5 days 2.8 (0.8 - 9.4)
   D. 6 to 9 days 1.7 (0.3 - 9.1)
   E. 10 to 19 days 0.0
   F. 20 to 29 days 0.6 (0.1 - 4.3)
   G. All 30 days 0.0

20. During the past 30 days, on how many days did you smoke cigarettes on school property?
   A. 0 days 98.6 (90.7 - 99.8)
   B. 1 or 2 days 0.0 (-)
   C. 3 to 5 days 1.4 (0.2 - 9.3)
   D. 6 to 9 days 0.0
   E. 10 to 19 days 0.0
   F. 20 to 29 days 0.0
   G. All 30 days 0.0

21. During the past 30 days, how did you usually get your own cigarettes?
   (Select only one response.)
   A. I did not smoke cigarettes during the past 30 days 90.6 (79.3 - 96.0)
   B. I bought them in a store such as a convenience store, supermarket, discount store, or gas station 0.0 (-)
   C. I bought them from a vending machine 0.0
   D. I gave someone else money to buy them for me 1.0 (0.2 - 4.5)
   E. I borrowed (or bummed) them from someone else 2.8 (0.8 - 9.2)
   F. A person 18 years old or older gave them to me 0.5 (0.1 - 4.2)
   G. I took them from a store or family member 2.3 (0.3 - 14.4)
   H. I got them some other way 2.8 (0.9 - 7.9)
22. During the past 30 days, what brand of cigarettes did you usually smoke? (Select only one response.)

Appendix A: Questionnaire

Alcohol

The next 8 questions ask about drinking alcohol. This includes drinking beer, wine, wine coolers, and liquor such as rum, gin, vodka, or whiskey. For these questions, drinking alcohol does not include drinking a few sips of wine for religious purposes.

33. Have you ever had a drink of alcohol, other than a few sips? % (95% CI)
   A. Yes 31.0 (17.7 - 48.4)
   B. No 69.0 (51.6 - 82.3)

34. How old were you when you had your first drink of alcohol other than a few sips?
   A. I have never had a drink of alcohol other than a few sips 67.9 (50.5 - 81.4)
   B. 8 years old or younger 7.1 (2.0 - 21.9)
   C. 9 years old 0.3 (0.0 - 2.2)
   D. 10 years old 2.5 (0.8 - 7.3)
   E. 11 years old 4.9 (2.3 - 10.2)
   F. 12 years old 10.6 (7.4 - 15.0)
   G. 13 years old or older 6.7 (2.8 - 15.5)

35. During the past 30 days, on how many days did you have at least one drink of alcohol?
   A. 0 days 86.2 (78.7 - 91.3)
   B. 1 or 2 days 10.2 (5.1 - 19.6)
   C. 3 to 5 days 2.4 (0.6 - 9.6)
   D. 6 to 9 days 0.7 (0.1 - 3.6)
   E. 10 to 19 days 0.3 (0.0 - 2.3)
   F. 20 to 29 days 0.0
   G. All 30 days 0.2 (0.0 - 1.9)

36. During the past 30 days, on how many days did you have 5 or more drinks of alcohol in a row, that is, within a couple of hours?
   A. 0 days 91.6 (82.0 - 96.3)
   B. 1 day 4.1 (1.2 - 12.9)
   C. 2 days 2.7 (0.8 - 9.5)
   D. 3 to 5 days 1.6 (0.3 - 8.5)
   E. 6 to 9 days 0.0
   F. 10 to 19 days 0.0
   G. 20 or more days 0.0

37. If you wanted to get some beer, wine, or hard liquor (for example, vodka, whiskey, or gin), how easy would it be for you to get?
   A. Very hard 61.3 (56.6 - 65.8)
   B. Sort of hard 15.1 (9.7 - 22.6)
   C. Sort of easy 14.0 (8.9 - 21.4)
   D. Very easy 9.6 (7.5 - 12.3)
Appendix A: Questionnaire

38. How wrong do your parents feel it would be for you to drink alcohol (beer, wine, or hard liquor) regularly?  
   A. Very wrong 84.5 (75.7 - 90.5)  
   B. Wrong 13.0 (6.8 - 23.3)  
   C. A little bit wrong 2.3 (0.6 - 8.1)  
   D. Not wrong at all 0.2 (0.0 - 1.9)

39. How wrong do you think it is for someone your age to drink alcohol (beer, wine, or hard liquor) regularly?  
   A. Very wrong 66.5 (55.6 - 75.8)  
   B. Wrong 27.0 (21.9 - 32.7)  
   C. A little bit wrong 5.2 (1.9 - 13.2)  
   D. Not wrong at all 1.4 (0.2 - 9.1)

40. How much do you think people risk harming themselves (physically or in other ways) if they have one or two drinks of beer, wine, or hard liquor nearly every day?  
   A. No risk 7.7 (3.3 - 16.8)  
   B. Slight risk 19.0 (15.1 - 23.6)  
   C. Moderate risk 29.4 (16.6 - 46.6)  
   D. Great risk 43.9 (31.9 - 56.6)

Marijuana and other Drug Use

The next 6 questions ask about marijuana use and other drug use. Marijuana also is called grass or pot.

41. Have you ever used marijuana?  
   A. Yes 18.7 (8.0 - 37.8)  
   B. No 81.3 (62.2 - 92.0)

42. How old were you when you tried marijuana for the first time?  
   A. I have never tried marijuana 81.3 (62.2 - 92.0)  
   B. 8 years old or younger 4.9 (1.5 - 15.3)  
   C. 9 years old 4.4 (0.7 - 23.4)  
   D. 10 years old 1.5 (0.4 - 5.1)  
   E. 11 years old 1.9 (0.6 - 6.2)  
   F. 12 years old 3.1 (0.9 - 10.0)  
   G. 13 years old or older 2.9 (0.8 - 10.1)

43. During the past 30 days, how many times did you use marijuana?  
   A. 0 times 91.7 (79.0 - 97.0)  
   B. 1 or 2 times 5.1 (1.7 - 14.3)  
   C. 3 to 9 times 1.0 (0.3 - 3.8)  
   D. 10 to 19 times 0.6 (0.1 - 2.7)  
   E. 20 to 39 times 0.0  
   F. 40 or more times 1.6 (0.3 - 8.4)
Appendix A: Questionnaire

44. Have you ever used any form of cocaine, including powder, crack, or freebase?  
   A. Yes  
   B. No  
<table>
<thead>
<tr>

### Health-Related Topics
The next 3 questions ask about other health-related topics.

61. Have you ever been taught about AIDS or HIV infection in school?  
   A. Yes 57.8 (35.7 - 77.2)  
   B. No 24.0 (12.6 - 40.8)  
   C. Not sure 18.2 (10.2 - 30.4)

62. Has a doctor or nurse ever told you that you have asthma?  
   A. Yes 26.7 (16.3 - 40.5)  
   B. No 66.8 (54.4 - 77.2)  
   C. Not sure 6.5 (3.4 - 12.2)

63. Do you still have asthma?  
   A. I have never had asthma 60.1 (45.7 - 73.0)  
   B. Yes 15.6 (8.8 - 26.3)  
   C. No 14.6 (6.6 - 29.3)  
   D. Not sure 9.6 (7.5 - 12.2)

### Resiliency Factors
How true do you feel the following 10 statements are for you?

64. My friends get into a lot of trouble.  
   A. Not true at all 28.2 (17.5 - 42.1)  
   B. A little true 57.5 (49.1 - 65.4)  
   C. Pretty much true 11.5 (7.1 - 17.9)  
   D. Very much true 2.9 (0.6 - 12.0)

65. I often do things without thinking about what will happen.  
   A. Not true at all 27.1 (16.6 - 40.9)  
   B. A little true 46.3 (33.2 - 60.0)  
   C. Pretty much true 11.5 (8.2 - 15.7)  
   D. Very much true 15.1 (7.7 - 27.5)

66. I have a friend about my own age who really cares about me.  
   A. Not true at all 10.9 (4.5 - 24.2)  
   B. A little true 19.7 (13.1 - 28.6)  
   C. Pretty much true 20.6 (13.4 - 30.5)  
   D. Very much true 48.7 (36.5 - 61.1)

67. Outside of my home and school, there is an adult who really cares about me.  
   A. Not true at all 15.0 (8.6 - 25.0)  
   B. A little true 4.9 (2.5 - 9.4)  
   C. Pretty much true 8.2 (3.9 - 16.4)  
   D. Very much true 71.9 (62.1 - 80.0)
68. At my school there is a teacher or some other adult who really cares about me.

</tr>
<tr>
<td>D. Very much true</td>
<td>40.7</td>
<td>(31.5 - 50.6)</td>
</tr>
</tbody>
</table>

71. In my school, there are clear rules about what students can and cannot do.  
<table>
<thead>
<tr>
<th>A. Not true at all</th>
<th>%</th>
<th>(95% CI)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>(0.2 - 5.9)</td>
<td></td>
</tr>
<tr>
<td>B. A little true</td>
<td>4.2</td>
<td>(1.8 - 9.2)</td>
</tr>
<tr>
<td>C. Pretty much true</td>
<td>20.4</td>
<td>(11.0 - 34.7)</td>
</tr>
<tr>
<td>D. Very much true</td>
<td>74.3</td>
<td>(61.9 - 83.7)</td>
</tr>
</tbody>
</table>

72. When I am not at home, one of my parents/guardians knows where I am and who I am with.  
<table>
<thead>
<tr>
<th>A. Not true at all</th>
<th>%</th>
<th>(95% CI)</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.8</td>
<td>(2.1 - 14.8)</td>
<td></td>
</tr>
<tr>
<td>B. A little true</td>
<td>12.0</td>
<td>(5.8 - 23.0)</td>
</tr>
<tr>
<td>C. Pretty much true</td>
<td>23.8</td>
<td>(18.7 - 29.7)</td>
</tr>
<tr>
<td>D. Very much true</td>
<td>58.5</td>
<td>(44.7 - 71.1)</td>
</tr>
</tbody>
</table>

73. Outside of my home and school, I am a part of clubs, sports teams, church/temple, or other group activities.  
<table>
<thead>
<tr>
<th>A. Not true at all</th>
<th>%</th>
<th>(95% CI)</th>
</tr>
</thead>
<tbody>
<tr>
<td>21.5</td>
<td>(11.2 - 37.3)</td>
<td></td>
</tr>
<tr>
<td>B. A little true</td>
<td>15.7</td>
<td>(9.3 - 25.5)</td>
</tr>
<tr>
<td>C. Pretty much true</td>
<td>17.9</td>
<td>(9.6 - 31.0)</td>
</tr>
<tr>
<td>D. Very much true</td>
<td>44.9</td>
<td>(31.6 - 58.9)</td>
</tr>
</tbody>
</table>
Your Family’s Food
This last question asks about the amount of food eaten by your family.

74. During the past 12 months, which of the following statements best describes the food eaten by you and your family?

<table>
<thead>
<tr>
<th>Description</th>
<th>%</th>
<th>(95% CI)</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Enough food to eat</td>
<td>97.4</td>
<td>(93.2 - 99.0)</td>
</tr>
<tr>
<td>B. Sometimes not enough food to eat</td>
<td>2.1</td>
<td>(0.7 - 6.1)</td>
</tr>
<tr>
<td>C. Often not enough food to eat</td>
<td>0.5</td>
<td>(0.1 - 4.1)</td>
</tr>
</tbody>
</table>

This is the end of the survey.
Thank you very much for your help.
