ACKNOWLEDGEMENTS

The production of this report was made possible by collaboration between the New Mexico Department of Health (NMDOH), and the New Mexico Public Education Department (NMPED), with technical support from the University of New Mexico Prevention Research Center (UNM PRC) and the Division of Adolescent and School Health, Centers for Disease Control and Prevention (CDC-DASH). Gratitude is extended to the individuals listed below for their contribution toward developing and producing this report.

New Mexico Public Education Department
Susanna M. Murphy, Ph.D., Secretary of Education
Sheila Hyde, Ph.D., Deputy Secretary, Learning and Accountability
Kristine M. Meurer, Ph.D., Acting Assistant Secretary, Student Success Division *
William O. Blair, Ph.D., Assistant Director, School and Family Support Bureau *
Dean Hopper, M.A.Ed., Assistant Director, School and Family Support Bureau
Lonnie Barraza, M.S.Ed, HIV Program Administrator *

New Mexico Department of Health
Alfredo Vigil, MD, Secretary
C. Mack Sewell, DrPH, MS, State Epidemiologist
Michael Landen, MD, MPH, Deputy State Epidemiologist *
Dan Green, MPH, Social Indicator Epidemiologist *
James Padilla, MS, Epidemiologist *
James Farmer, MPH, Health Services Manager, Office of School and Adolescent Health *
Mary M. Ramos, MD, School Health Officer *

Appendix A 83
Introduction

This report contains county level middle school results from the 2009 New Mexico Middle School Youth Risk and Resiliency Survey (YRRS), a statewide survey of public school students, grades 6 - 8. Statewide and county level results will be available at www.YouthRisk.org and www.health.state.nm.us/ERD/HealthData/yrrs.shtml. Together, these documents comprise a useful tool for those working on youth-related issues at the state and local level.

The YRRS is organized into two major content areas: risk behaviors and protective (resiliency) factors. Risk behaviors include behaviors associated with unintentional injury, violence, sadness and suicidal ideation, tobacco use, alcohol use, drug use, sexual activity, physical activity, and nutrition. Protective or resiliency factors are measures of the positive and supportive relationships, experiences, activities, resources and values that encourage healthy youth development. Resiliency factors and related traits include caring and supportive relationships in the family, school, community and with peers; boundaries set by the family and school; positive peer support; meaningful participation and constructive use of time in school and outside of school; and others (Appendix B).

Additionally, this report includes a section on academic measures and traits. These academic measures include getting good grades (mostly A's and B's), trying hard to do good work in school, planning to go to college, skipping or ditching school, coming to class with paper and something to write with, and completing homework.

How to Read this Report

This report has three main sections, each of which consists of a set of bar and line charts. The first section presents the results of the major risk behaviors examined in the survey. Each category of risk behavior is presented with several data charts. At the beginning of each topic area, a set of line charts gives results for multiple survey years of the YRRS (2003, 2005, 2007, and 2009). A following set of bar charts compares results for the county to results for the entire state, compares the behaviors of boys to those of girls, and makes comparisons between grade levels within the county.

The second section presents results for the academic measures and behaviors. As with the risk behaviors, there are line and bar charts presenting trends, a comparison between the state and the county, a comparison between boys and girls in the county, and a comparison of grade levels within the county. Using the same styles of charts, the third section of the report presents results for the resiliency/protective factors.

In some cases when there were very few students in a particular age or gender group, data have been suppressed to protect the anonymity of the individual respondents.

---------------------------------------------------------------------------------------------------------------------------------

NOTE: County level YRRS reports are freely available. School district reports have been distributed to school district offices. School districts are encouraged to reproduce and share these reports with community groups concerned with prevention and health promotion. However, school district level results will not be released without express permission of the school district superintendent. Forms for requesting school district data are available at www.YouthRisk.org.
Understanding the Charts - and A Word about Error Bars

The bar charts in this report present the percentage of students who reported engaging in any given risk behavior or who reported having any given protective factor. The height of the bars conveys the percentage of students reporting each trait, and provides a quick visual comparison between different groups of students reporting that trait. A label for each bar presents the actual percentage of students who reported each trait. For instance, the chart on page 17, Personal Safety: Injury, shows that 7.2% of students in New Mexico rarely or never wore seatbelts, while 3.6% of students in De Baca County rarely or never wore seatbelts.

Because of the high cost and logistical complications involved in conducting a statewide survey, the YRRS was administered to a sample of students, rather than to every single student in each school district. Because YRRS data are from a sample of students, and not the entire student body, the results in this report are estimates. As with all estimates, there is some uncertainty associated with each of these estimates. On the charts in this report, this degree of uncertainty is represented by an error bar (or confidence interval). The error bar is the thin 'I' shaped line that extends above and below the end of each bar in a chart. One of the major influences on the size of the confidence interval or error bar is the number of participants in the survey. In general, this means that with more students participating in the survey, there will be a higher degree of confidence in the results (i.e., error bars will be smaller).

The proper interpretation of an error bar can be illustrated by looking at the chart below. This chart compares the New Mexico prevalence of smoking and cocaine use to the United States prevalence for 2005, a previous survey year. The chart shows that the prevalence of current smoking was 25.7% in New Mexico and 23.0% in the United States. The error bar for the estimate of current smoking among New Mexico students extends approximately 4 percentage points in either direction, from 22.0% to 29.8%. This means that we are confident that the actual percentage of smokers in this group of students was between 22.0% and 29.8%. The error bar for the estimate current smoking in the US extends approximately 2.5 percentage points in either direction, from 20.7 to 25.3%. We are confident that the actual percentage of smokers among this group was between 20.7% and 25.3%.
How does knowing the upper and lower limits of our error bars help us? While it appears at first glance that New Mexico had a higher prevalence of smoking than the United States (25.7% vs. 23.0%), a closer look at the error bars shows a more complicated picture. The error bars for the New Mexico estimate (22.0% - 29.8%) and the US estimate (20.7% - 25.3%) overlap. Because of this overlap, we do not have a high degree of confidence that the prevalence of smoking in New Mexico is actually different from the prevalence in the United States. In other words, the difference between the prevalence of smoking in New Mexico and the United States is not statistically significant.

For cocaine use it also appears that in 2005, New Mexico had a higher prevalence than the United States (7.9% vs. 3.4%). The error bar for New Mexico extends from 6.6% to 9.5%, and the error bar for the United States extends from 2.8% to 4.4%. Because the higher bound of the US error bar (4.4%) is lower than the lower bound of the NM error bar (6.6%), these error bars do not overlap. For cocaine use, we are confident in saying that the New Mexico prevalence was higher than the US prevalence. In other words, the difference between the 2005 prevalence of cocaine use in New Mexico and the United States was a statistically significant difference.

For some small counties, error bars have been removed from this report. With small populations, the number of students sampled can approach the total student population. In these cases, error bars would have limited meaning because with a high percentage of students surveyed, there is less uncertainty around the estimates than error bars suggest.

Current Smoking and Current Cocaine Use
Grades 9 - 12, 2005

<table>

Error bars DO overlap. No statistically significant difference.
Methodology

The YRRS was implemented in the fall semester of the 2009-10 school year. All public school districts in New Mexico were invited to participate in the 2009 Middle School YRRS. Of 89 districts statewide, 74 districts participated. From each participating school district, schools with students from 6th to 8th grades were selected to participate.* The probability of selection of each school was proportional to the size of its 6th-8th grade population. In large school districts only some of the schools were selected to participate, while in small districts, all schools were selected. Classrooms were systematically selected from each school, and all students in each selected classroom were asked to participate.

In each participating school, a single day was arranged on which to administer the survey. Questionnaire forms and pencils were distributed to each student in participating classes, and students were asked to fill out the questionnaires independently of other students and without teacher assistance.

Questionnaires were electronically scanned, and data were analyzed using STATA 10.1, a statistical software program.

Limitations of the YRRS

All information from the YRRS was self-reported by the participating students. While most questions on the YRRS come from nationally validated surveys, and data quality has been demonstrated to be very high in national surveys, there is no way to guarantee the truthfulness of the participants in any survey that relies on self-reporting.

A good response rate is one of the most important goals in conducting a survey. At the school district level, a response rate is the percentage of all students selected for the survey who complete and return a useable questionnaire form. At the state level, the response rate incorporates the participation of school districts and schools as well as the participation of students. An adequate response rate means that survey results are more likely to represent the actual student population. The statewide response rate for the 2009 Middle School YRRS was 68%, an adequate response rate to represent the population.

In order to achieve a statewide response rate of 60% or greater, we aimed for a 75% response rate from each participating school district. Most participating school districts and counties met this target or were close to it. While the response rate was generally very good in participating schools, the overall response rate was driven down by the school districts that declined to participate.

* The High School YRRS was also conducted at the same time; results from that survey are published separately.
Participation in De Baca County

The response rate for De Baca County was 42%.

A high response rate produces survey results that are more representative of the student population. A response rate of at least 60% allows generalization of results to the entire student body. A response rate of 75% is excellent and allows a high degree of confidence in results. Because a high response rate means that more students have been surveyed, a high response rate will also be reflected in the error bars (i.e., with a higher response rate and more students included in the survey, error bars will be smaller and confidence intervals will be narrower). Response rates below 60% are considered low, and caution should be exercised in interpreting results. Low response rates indicate that the data may represent only students who participated in the survey and not necessarily the entire student body.

Tobacco: Behaviors of Current Cigarette Smokers
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

Frequent smokers *
Bought my own cigarettes in a store **
Marlboro is my regular cigarette brand
Tried to quit smoking ***

* Among current smokers, percent who smoked on at least 20 of the last 30 days
** In the past 30 days, among current smokers < 18 yrs old
*** In the past 12 months
Tobacco: Other Use and Exposure
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

- Current cigar use *: 7.1% (NM) vs. 7.8% (De Baca)
- Current spit tobacco use **: 4.3% (NM) vs. 0.0% (De Baca)
- In the same room with someone smoking cigarettes ***: 36.1% (NM) vs. 49.8% (De Baca)

* Cigars, cigarillos, or little cigars, in the past 30 days
** Chewing tobacco, snuff, or dip, in the past 30 days
*** In the past 7 days
Tobacco: Plans to Smoke
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

Of those who have not smoked cigarettes in the past 30 days

- Will smoke a cigarette in the next year *
- Would smoke a cigarette if offered by one of best friends **

Of those who have never smoked a cigarette

- Will smoke a cigarette in the next year *
- Would smoke a cigarette if offered by one of best friends **

* Answered "Probably yes" or "Definitely yes" to the question, "Do you think you will smoke a cigarette at anytime during the next year?"

**Answered "Probably yes" or "Definitely yes" to the question, "If one of your best friends offered you a cigarette, would you smoke it?"
Exposure to Information on the Dangers of Tobacco
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

Saw or heard commercials about the dangers of cigarette smoking

- NM: 71.5%
- De Baca: 88.4%

Taught in school about the dangers of tobacco use **

- NM: 47.2%
- De Baca: 38.2%

* Commercials on the TV, the Internet, or the radio
** During the school year that the survey was administered
Alcohol
**Alcohol**
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

- **Ever drank alcohol**: 33.8% (NM) vs. 37.3% (De Baca)
- **First drink of alcohol before age 11**: 16.5% (NM) vs. 13.1% (De Baca)
- **Current drinker**: 16.2% (NM) vs. 18.8% (De Baca)
- **Binge drinker**: 8.6% (NM) vs. 8.1% (De Baca)

* * Other than a few sips
** * Drank alcohol on at least one of the past 30 days
*** * Had five or more drinks in a row, or within a couple of hours, in the past 30 days
Easy for me to get alcohol *

My parents think my alcohol use would be very wrong **

I think youth alcohol use is very wrong **

People face great risk from daily alcohol use ***

* Responded "Very easy" or "Sort of easy" to get beer, wine, or hard liquor

** How wrong do "your parents", or "you" feel it would be for you or someone your age to drink alcohol regularly?"

*** How much do you think people risk harming themselves (physically or in other ways) if they have one or two drinks of beer, wine, or hard liquor nearly every day?"
Drugs
Drugs
New Mexico and De Baca County
Grades 6 - 8, 2009 NM YRRS

* At least once in the past 30 days
** Sniffed glue, breathed the contents of spray cans, or inhaled any paints or sprays to get high

**Violence-Related Behaviors**
**The next 2 questions ask about violence-related behaviors.**

10. Have you ever carried a weapon, such as a gun, knife, or club?
    A. Yes 29.8  
    B. No 70.2

11. Have you ever been in a physical fight?
    A. Yes 53.7  
    B. No 46.3
Appendix A: Questionnaire

The next question asks about bullying. Bullying is when 1 or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again. It is not bullying when 2 students of about the same strength or power argue or fight or tease each other in a friendly way.

12. During the past 12 months, have you ever been bullied on school property?
   A. Yes
   B. No

Sadness and Attempted Suicide
The next 3 questions ask about attempted suicide. Sometimes people feel so depressed about the future that they may consider attempting suicide or killing themselves.

13. Have you ever seriously thought about killing yourself?
    A. Yes
    B. No

14. Have you ever made a plan about how you would kill yourself?
    A. Yes
    B. No

15. Have you ever tried to kill yourself?
    A. Yes
    B. No

Tobacco Use
The next 17 questions ask about tobacco use.

16. Have you ever tried cigarette smoking, even one or two puffs?
    A. Yes
    B. No

17. How old were you when you smoked a whole cigarette for the first time?
    A. I have never smoked a whole cigarette
    B. 8 years old or younger
    C. 9 years old
    D. 10 years old
    E. 11 years old
    F. 12 years old
    G. 13 years old or older
18. About how many cigarettes have you smoked in your entire life?  
   A. None  66.6% (95% CI)  
   B. 1 or more puffs but never a whole cigarette  16.7%  
   C. 1 cigarette  0.0%  
   D. 2 to 5 cigarettes  3.9%  
   E. 6 to 15 cigarettes (about 1/2 a pack total)  8.5%  
   F. 16 to 25 cigarettes (about 1 pack total)  4.3%  
   G. 26 to 99 cigarettes (more than 1 pack, but less than 5 packs)  0.0%  
   H. 100 or more cigarettes (5 or more packs)  0.0%  

19. During the past 30 days, on how many days did you smoke cigarettes?  
   A. 0 days  88.0%  
   B. 1 or 2 days  7.8%  
   C. 3 to 5 days  4.2%  
   D. 6 to 9 days  0.0%  
   E. 10 to 19 days  0.0%  
   F. 20 to 29 days  0.0%  
   G. All 30 days  0.0%  

20. During the past 30 days, on how many days did you smoke cigarettes on school property?  
   A. 0 days  100.0%  
   B. 1 or 2 days  0.0%  
   C. 3 to 5 days  0.0%  
   D. 6 to 9 days  0.0%  
   E. 10 to 19 days  0.0%  
   F. 20 to 29 days  0.0%  
   G. All 30 days  0.0%  

21. During the past 30 days, how did you usually get your own cigarettes?  
   (Select only one response.)  
   A. I did not smoke cigarettes during the past 30 days  88.0%  
   B. I bought them in a store such as a convenience store, supermarket, discount store, or gas station  0.0%  
   C. I bought them from a vending machine  0.0%  
   D. I gave someone else money to buy them for me  4.2%  
   E. I borrowed (or bummed) them from someone else  7.8%  
   F. A person 18 years old or older gave them to me  0.0%  
   G. I took them from a store or family member  0.0%  
   H. I got them some other way  0.0%
22. During the past 30 days, what brand of cigarettes did you usually smoke?
(Select only one response.)

Appendix A: Questionnaire

Alcohol

The next 8 questions ask about drinking alcohol. This includes drinking beer, wine, wine coolers, and liquor such as rum, gin, vodka, or whiskey. For these questions, drinking alcohol does not include drinking a few sips of wine for religious purposes.

33. Have you ever had a drink of alcohol, other than a few sips?  
   A. Yes  
   B. No  

34. How old were you when you had your first drink of alcohol other than a few sips?  
   A. I have never had a drink of alcohol other than a few sips  
   B. 8 years old or younger  
   C. 9 years old  
   D. 10 years old  
   E. 11 years old  
   F. 12 years old  
   G. 13 years old or older  

35. During the past 30 days, on how many days did you have at least one drink of alcohol?  
   A. 0 days  
   B. 1 or 2 days  
   C. 3 to 5 days  
   D. 6 to 9 days  
   E. 10 to 19 days  
   F. 20 to 29 days  
   G. All 30 days  

36. During the past 30 days, on how many days did you have 5 or more drinks of alcohol in a row, that is, within a couple of hours?  
   A. 0 days  
   B. 1 day  
   C. 2 days  
   D. 3 to 5 days  
   E. 6 to 9 days  
   F. 10 to 19 days  
   G. 20 or more days  

37. If you wanted to get some beer, wine, or hard liquor (for example, vodka, whiskey, or gin), how easy would it be for you to get?  
   A. Very hard  
   B. Sort of hard  
   C. Sort of easy  
   D. Very easy  

91
38. How wrong do your parents feel it would be for you to drink alcohol (beer, wine, or hard liquor) regularly?  
   % (95% CI)  
   A. Very wrong 84.4  
   B. Wrong 15.6  
   C. A little bit wrong 0.0  
   D. Not wrong at all 0.0  

39. How wrong do you think it is for someone your age to drink alcohol (beer, wine, or hard liquor) regularly?  
   A. Very wrong 61.8  
   B. Wrong 26.5  
   C. A little bit wrong 7.8  
   D. Not wrong at all 3.9  

40. How much do you think people risk harming themselves (physically or in other ways) if they have one or two drinks of beer, wine, or hard liquor nearly every day?  
   A. No risk 12.5  
   B. Slight risk 12.8  
   C. Moderate risk 34.0  
   D. Great risk 40.8  

Marijuana and other Drug Use
The next 6 questions ask about marijuana use and other drug use. Marijuana also is called grass or pot.

41. Have you ever used marijuana?  
   A. Yes 15.9  
   B. No 84.1  

42. How old were you when you tried marijuana for the first time?  
   A. I have never tried marijuana 84.1  
   B. 8 years old or younger 0.0  
   C. 9 years old 0.0  
   D. 10 years old 0.0  
   E. 11 years old 0.0  
   F. 12 years old 12.0  
   G. 13 years old or older 3.9  

43. During the past 30 days, how many times did you use marijuana?  
   A. 0 times 91.9  
   B. 1 or 2 times 3.9  
   C. 3 to 9 times 0.0  
   D. 10 to 19 times 4.2  
   E. 20 to 39 times 0.0  
   F. 40 or more times 0.0
44. Have you ever used **any** form of cocaine, including powder, crack, or freebase?
   A. Yes 0.0
   B. No 100.0

45. Have you ever sniffed glue, or breathed the contents of spray cans, or inhaled any paints or sprays to get high?
   A. Yes 20.1
   B. No 79.9

46. Have you ever used a needle to inject any **illegal** drug into your body?
   A. Yes 0.0
   B. No 100.0

**Sexual Behavior**

The next 4 questions ask about sexual intercourse.

47. Have you ever had sexual intercourse?
   A. Yes 18.8
   B. No 81.2

48. How old were you when you had sexual intercourse for the first time?
   A. I have never had sexual intercourse 81.2
   B. 8 years old or younger 0.0
   C. 9 years old 0.0
   D. 10 years old 0.0
   E. 11 years old 4.2
   F. 12 years old 3.6
   G. 13 years old or older 11.0

49. With how many people have you ever had sexual intercourse?
   A. I have never had sexual intercourse 81.2
   B. 1 person 7.7
   C. 2 people 7.5
   D. 3 people 3.6
   E. 4 people 0.0
   F. 5 people 0.0
   G. 6 or more people 0.0

50. The **last time** you had sexual intercourse, did you or your partner use a condom?
   A. I have never had sexual intercourse 81.2
   B. Yes 18.8
   C. No 0.0
Appendix A: Questionnaire

Body Weight
The next 6 questions ask about body weight.

51. How do you describe your weight? % (95% CI)
   A. Very underweight 4.7
   B. Slightly underweight 0.0
   C. About the right weight 78.4
   D. Slightly overweight 12.8
   E. Very overweight 4.1

52. Which of the following are you trying to do about your weight?
   A. Lose weight 31.3
   B. Gain weight 3.6
   C. Stay the same weight 23.3
   D. I am not trying to do anything about my weight 41.8

53. Have you ever exercised to lose weight or to keep from gaining weight?
   A. Yes 66.3
   B. No 33.7

54. Have you ever eaten less food, fewer calories, or foods low in fat to lose weight or to keep from gaining weight?
   A. Yes 35.5
   B. No 64.5

55. Have you ever gone without eating for 24 hours or more (also called fasting) to lose weight or to keep from gaining weight?
   A. Yes 11.0
   B. No 89.0

56. Have you ever vomited or taken laxatives to lose weight or to keep from gaining weight?
   A. Yes 4.1
   B. No 95.9

Physical Activity
The next 4 questions ask about physical activity.
57. During the past 7 days, on how many days were you physically active for a total of at least 60 minutes per day? (Add up all the time you spend in any kind of physical activity that increases your heart rate and makes you breathe hard some of the time.)

<table>
<thead>

Appendix A: Questionnaire

Health-Related Topics
The next 3 questions ask about other health-related topics.

61. Have you ever been taught about AIDS or HIV infection in school?  %  (95% CI)
   A. Yes  74.7
   B. No  8.1
   C. Not sure  17.2

62. Has a doctor or nurse ever told you that you have asthma?
   A. Yes  28.8
   B. No  54.3
   C. Not sure  17.0

63. Do you still have asthma?
   A. I have never had asthma  46.5
   B. Yes  21.9
   C. No  18.4
   D. Not sure  13.2

Resiliency Factors
How true do you feel the following 10 statements are for you?

64. My friends get into a lot of trouble.
   A. Not true at all  27.9
   B. A little true  45.0
   C. Pretty much true  19.7
   D. Very much true  7.5

65. I often do things without thinking about what will happen.
   A. Not true at all  20.5
   B. A little true  39.1
   C. Pretty much true  29.4
   D. Very much true  11.0

66. I have a friend about my own age who really cares about me.
   A. Not true at all  3.9
   B. A little true  11.0
   C. Pretty much true  13.3
   D. Very much true  71.8

67. Outside of my home and school, there is an adult who really cares about me.
   A. Not true at all  3.6
   B. A little true  12.0
   C. Pretty much true  0.0
   D. Very much true  84.5
Appendix A: Questionnaire

68. At my school there is a teacher or some other adult who really cares about me.
   A. Not true at all 7.8
   B. A little true 16.5
   C. Pretty much true 31.1
   D. Very much true 44.6

69. In my home, there is a parent or some other adult who listens to me when I have something to say.
   A. Not true at all 0.0
   B. A little true 8.1
   C. Pretty much true 8.1
   D. Very much true 83.8

70. In my home, there is a parent or some other adult who talks with me about my problems.
   A. Not true at all 4.5
   B. A little true 4.5
   C. Pretty much true 3.6
   D. Very much true 87.3

71. In my school, there are clear rules about what students can and cannot do.
   A. Not true at all 0.0
   B. A little true 3.9
   C. Pretty much true 12.0
   D. Very much true 84.1

72. When I am not at home, one of my parents/guardians knows where I am and who I am with.
   A. Not true at all 0.0
   B. A little true 8.4
   C. Pretty much true 27.7
   D. Very much true 63.9

73. Outside of my home and school, I am a part of clubs, sports teams, church/temple, or other group activities.
   A. Not true at all 20.1
   B. A little true 0.0
   C. Pretty much true 7.7
   D. Very much true 72.1
Your Family’s Food
This last question asks about the amount of food eaten by your family.

74. During the past 12 months, which of the following statements best describes the food eaten by you and your family? % (95% CI)
   A. Enough food to eat 96.1
   B. Sometimes not enough food to eat 0.0
   C. Often not enough food to eat 3.9

This is the end of the survey.
Thank you very much for your help.
