Summary of Activity: Week 51
December 18th – December 24th, 2016

- New Mexico ILI activity is currently 2.2% which is at the national baseline
- US ILI has increased to 2.9%
- Influenza activity is above the NM baseline of 2.2% two health regions
- There continues to be only sporadic laboratory activity
- No influenza-related outbreaks have been reported this week

New Mexico Department of Health (NMDOH) is collaborating with 29* ILI sentinel sites for the 2016-2017 season. Sites report weekly on the number of patients that present to their facility with influenza-like illness. That number is then divided by the total number of patients seen for any reason, resulting in percent of ILI activity. ILI is defined as fever of > 100° F and cough and sore throat in absence of known cause.

New Mexico and U.S. ILI Activity, 2012 to Present

* See appendix for 29 reporting sites

**Outbreak:** An influenza outbreak is defined as at least two cases of ILI in a specific area with at least one lab confirmed case.

**PCR Testing:** Polymerase Chain Reaction (PCR) tests can identify the presence of influenza viral RNA in respiratory specimens. PCR testing is performed at various laboratories across New Mexico.
Since the start of the 2016-2017 influenza season, laboratories have reported that a total of 51 out of 3,205 respiratory specimens have tested positive for influenza by PCR. Four positive specimens were subtyped as A(H1N1), 25 were A(H3N2), 10 influenza A specimen was not subtyped. Two tested positive as influenza B not subtyped, 0 positive specimens were identified as B(Victoria) and 4 as B(Yamagata).
### Laboratory Sites Participating in Rapid Influenza Data Collection (Facility name, City)

**NW**
- San Juan Regional Medical Center, Farmington; and Acoma-Canoncito-Laguna Indian Health Hospital, Acoma Pueblo
- Gallup Indian Medical Center, Gallup; Zuni Hospital, Zuni; Crownpoint IHS, Gallup

**NE**
- Taos-Picuris Indian Health Clinic, Taos; Pecos Valley Medical Center, Pecos; La Familia Medical Clinics, Santa Fe; Los Alamos Family Care Clinic, Los Alamos; Jicarilla Apache Indian Health Clinic, Dulce; Children's Clinic PA, Los Alamos
- Los Alamos Medical Center, Los Alamos; Dulce Health Center, Dulce; Christus St. Vincent. Santa Fe; Alta Vista Regional Hospital, Las Vegas; Miners' Colfax Medical Center, Raton

**Metro**
- Lovelace Downtown Medical Center, Albuquerque; University of New Mexico Student Health Clinic, Albuquerque; Presbyterian Medical Group-Atrisco, Northside, Pediatric Urgent Care; Albuquerque Health Partners Urgent Care, Rio Rancho
- Quest Diagnostic Laboratory, Albuquerque

**SW**
- Gila Regional Medical Center, Silver City; Hidalgo Medical Services Clinic, Lordsburg; Ben Archer Health Center, Deming, Columbus, and Dona Ana; La Clinica de Familia, Sunland Park; Mescalero Apache Indian Health Hospital, Mescalero; New Mexico Mining and Technology Institute, Socorro
- Gerald Champion, Alamogordo

**SE**
- Carlsbad Medical Center, Carlsbad; Lea Regional Medical Center, Hobbs; Eastern New Mexico Medical Center, Roswell; Roosevelt General Hospital Clinic, Portales
- Artesia General Hospital, Artesia; Carlsbad Medical Center, Carlsbad; Lea Regional Medical Center, Hobbs; Eastern New Mexico Medical Center, Roswell

Antiviral Information and Data

Persons at higher risk for influenza complication recommended for antiviral treatment include:

• Children aged younger than 2 years & adults aged 65 years and older
• Persons with chronic medical conditions
• Persons with immunosuppression, including that caused by medications or by HIV infection
• Women who are pregnant or postpartum (within 2 weeks after delivery)
• Persons aged younger than 19 years who are receiving long-term aspirin therapy
• American Indians/Alaska Natives
• Persons who are morbidly obese (i.e., BMI is 40 or greater)
• Residents of nursing homes and other chronic-care facilities
Appendix

*Geographic spread is based on CDCs activity estimates definitions. For more information visit: [http://www.cdc.gov/flu/weekly/overview.htm](http://www.cdc.gov/flu/weekly/overview.htm)

In accordance with New Mexico Administrative Code (NMAC) 7.4.3.13 **Influenza is a reportable condition for the following:**

- Influenza, laboratory confirmed hospitalizations only
- Influenza-associated pediatric death
- Acute Illness or condition of any type involving large numbers of persons in the same geographic area (outbreaks)
- Other illnesses or condition of public health significance (novel influenza A)

For more information on reportable conditions please visit: [http://www.nmcpr.state.nm.us/nmac/parts/title07/07.004.0003.htm](http://www.nmcpr.state.nm.us/nmac/parts/title07/07.004.0003.htm)
