Dear LNPPs:

While the application period for new, third party manufactures in the Medical Cannabis Program remains closed, the Department of Health will start accepting requests for amended licenses from LNPPs who are not currently manufacturing for themselves and wish to do so. The Medical Cannabis Program has allowed LNPPs to request to manufacture cannabis-derived products for themselves and distribute those products from their own dispensaries under their LNPP license.

LNPPs must submit a request for an amended license and obtain approval from the Department before beginning any manufacturing. The Department is not considering any proposals for an LNPP to manufacture for other LNPPs.

There are currently twelve-approved manufacturers in New Mexico's Medical Cannabis Program that are available to all LNPPs.

This list can be found online at <https://nmhealth.org/publication/view/general/3964/>.

Thank you,

Martinik Gonzales  
License and Compliance Manager  
NM Dept. of Health
