

March 25, 2019

Dear Medical Cannabis Patients:

The Department of Health (DOH) has initiated a patient survey to get feedback about the Medical Cannabis Program (MCP). On March 1, DOH adopted an emergency rule, raising the plant count for nonprofit producers from 450 to 2,500 plants. The Department has until late August to implement a final rule. As part of the rule making process, DOH has initiated a random-sample survey of patient. Producers will also be surveyed. DOH has contracted with Research and Polling to conduct the telephone surveys, which are scheduled to begin the week of March 25. The surveys should be completed by no later than mid-April.

MCP appreciates your participation and assistance in gathering this information as we strive to make improvements to the program.

Thank you,

Kenny Vigil
Medical Cannabis Program Director
