

9,421 TB CASES REPORTED IN THE U.S. IN 2014

TAKE ON TB

Too many people in our country still suffer from tuberculosis (TB).

A Typical TB Case Requires:

PLUS

- X-rays
- Lab tests
- Follow-up & testing of contacts

Total cost to U.S. for TB cases in 2014.

Our progress towards elimination may be slowing - the U.S. saw the smallest decline in cases in over 10 years!

TB CAN HAPPEN ANYWHERE & TO ANYONE!

To eliminate TB, we must reach the hardest hit populations.

TB case rates are:

Higher for
Asians
than whites.

Higher for
African Americans
than whites.

Higher for
Hispanics/Latinos
than whites.

2 out of every 3

TB cases occur among foreign-born persons.

DRUG-RESISTANT TB IS COMPLEX & COSTLY.

Drug-resistance threatens our ability to treat & control TB.

TOTAL 2014 CASES

DIRECT TREATMENT COST PER CASE

ELIMINATING TB REQUIRES A COMPREHENSIVE APPROACH.

CDC is committed to fighting TB whenever & wherever it occurs through:

Vigilant Surveillance

Better Diagnostics & Treatments

Testing & Treatment of High-Risk Populations

Education of Health Care Providers
