Parents can now obtain their child’s shot record—or their shot record—from the State of New Mexico (NMSIIS) using their electronic device.

Parents can simply go to VaxViewNM.org

Here is the information parents will need to obtain their child’s (or their own) vaccination record:
• Patient’s name—the child’s or adult patient’s name
• Date of birth
• Cell phone number or email address*

NMSIIS now offers parents the ability to print their child’s shot record at VaxViewNM.org

If parents are unable to access their child’s immunization record, we ask that they contact their provider. As a provider, we request that you please use your NMSIIS access to update your patient’s demographic information.

Benefits of VaxViewNM
• A time-saver for parents—they can now access and print their own (or their child’s) shot records from home.
• A time-saver for your office, as parents will no longer need to come to the office to obtain a copy of their shot record.

During the transition roll-out of VaxViewNM, if a patient calls because they are unable to access their vaccination record, please help them by:
• Double-checking NMSIIS to make sure cell phone, email address, and name are correct
• If you see duplicate immunization records, please contact the NMSIIS help desk

Thank you for helping to make sure your patients’ records are up to date!

*The security and protection of patient records is our highest priority. VaxViewNM uses two-factor authentication via text messaging or email to validate patient, parent, or guardian access. If parents are unable to access their record, please verify their contact information. VaxViewNM is a free service provided by the New Mexico Department of Health Immunization Program.
