Isn’t it worth a few hours of training to make sure they’re fully immunized?
Each year, approximately 28,000 children are born in New Mexico. Every one of these children will need 18-22 immunizations by age six to protect them from debilitating, life threatening diseases. New vaccines are quickly becoming available, resulting in a complex childhood immunization schedule for a large population.

Keeping track of families is another challenge for health care professionals. The average family relocates multiple times over the course of a lifetime, frequently leaving medical records and valuable immunization information behind. As many as 25% of children visit two or more providers for immunizations before their third birthday.

With an initial investment of just a few hours of training, you can ensure that the children in your practice — even those who are new patients — are fully immunized. This initial investment will also produce future savings of time and expense associated with locating immunization records and providing immunization information.

Benefits of using NMSIIS

NMSIIS aids your health care organization by saving both time and money. By using NMSIIS, health care organizations:

- Reduce staff time needed to obtain scattered immunization records.
- Reduce expenses and risk incurred by administering duplicate immunizations.
- Reduce missed vaccination opportunities.
- Reduce costs associated with pulling records for the Clinic Assessment Software Application (CASA).
- Decrease incidence of disease.
- Decrease incidence of vaccine adverse reactions.
- Prevent vaccine waste through better inventory management.
- Reduce staff time needed to produce recall and reminder notices.
- Improve efficiency of office operations.

Staff training

NMSIIS training takes an average of just a couple of hours for the typical user and can be held at a time and place convenient for you and your staff. NMSIIS is designed to be user friendly, so your staff will be able to use the system with little assistance following training. The average NMSIIS user feels comfortable with the system after just one week of use. When help is needed, NMSIIS also offers screen-specific online help, a printable online user manual, and technical support from the NMSIIS Help Desk.

Security and confidentiality

NMSIIS has several security features built into its system to ensure the confidentiality of your patients’ information. NMSIIS uses data encryption for all data going to and from NMSIIS and is compliant with Health Insurance Portability and Accountability Act of 1996 (HIPAA) standards.

Getting started

Since NMSIIS is a Web-based application, there is no installation or software downloads necessary to get started; your organization needs only a personal computer with an Internet connection. In fact, once your staff is trained on NMSIIS, you...
