Medical Cannabis Program Division

Public Health and Safety Committee

April 26, 2022

Dominick V. Zurlo, Ph.D.
Medical Cannabis Program Division Director
Before we start...

On behalf of all colleagues at the Department of Health, we humbly acknowledge we are on the unceded ancestral lands of the original peoples of the Apache, Navajo and Pueblo past and present.

With gratitude we pay our respects to the land, the people and the communities that have and continue to contribute to what today is known as the State of New Mexico.
Mission – Department of Health

To ensure health equity, we work with our partners to promote health and well-being, and improve health outcomes for all people in New Mexico.

Goals

1. **We expand equitable access** to services for all New Mexicans

2. **We ensure safety** in New Mexico healthcare environments

3. **We improve health status** for all New Mexicans

4. **We support each other** by promoting an environment of mutual respect, trust, open communication, and needed resources for staff to serve New Mexicans and to grow and reach their professional goals
The purpose of the Lynn and Erin Compassionate Use Act is to allow the beneficial use of medical cannabis in a regulated system for alleviating symptoms caused by debilitating medical conditions and their medical treatments.
Medical Cannabis Patients in All NM Counties

- 133,113 enrolled patients as of March 31, 2022
- Three counties with highest number of patients enrolled:
  - Bernalillo: 44,295
  - Santa Fe: 14,136
  - Dona Ana: 12,447
- 669 Out-of-state enrollments
  - These are individuals who enrolled during the brief period in 2019 when out-of-state enrollments were legal.
Patient Enrollment 2018-2022

Increase of 82,159 individuals or 161% in active enrollments from 2018 to 2022
Increase of 47,945 individuals or 56% in active enrollments from 2020 to 2022
The Three Most Commonly Enrolled Qualifying Conditions

There are currently 28 qualifying conditions...
The Three Most Commonly Enrolled Qualifying Conditions
(percentage of total enrollment)

March 2018 to March 2020 (%)

- Post-Traumatic Stress Disorder
- Severe Chronic Pain
- Cancer

This represents 89.62% of all active enrolled patients
*data is as of March 31, 2022

</tr>
</tbody>
</table>
Difference between Medical and Adult Use

Medical

- Additional legal protections
  - Probation protection
  - Possession (425 units)
- Patients submit certification annually
- Patient registry overseen by MCP

Adult Use

- Can possess up to 2 ounces, 16 grams concentrate
- Cannabis Control Division in Regulation and Licensing Department (RLD) oversees all licensing
What Adult Use and Medical Have in Common

• No public use
• People can gift product but cannot sell
• Anybody 21 or older can grow six mature six seedlings (12 mature per household maximum)
• Products must be safely stored in a secure way
• Keep away from children and pets
• Cannabis cannot be legally transported across state lines
• Product must be from an intrastate source – in other words: buy local – buy New Mexican!
Medical Cannabis Program Division

Elizabeth Bisio, MSc, CHES Health Educator
Education and Outreach

- Educate patients, medical providers, community members, and other stakeholders about the Medical Cannabis Program and cannabis use
- Presentations successfully moved to online platforms to be more inclusive
- Attend and present at conferences in person and virtual
- Connect, present, and partner with agencies such as Treatment Courts, Therapy Teams, Judges, Prosecutors, Law Enforcement, Medical Providers, patients, etc.
Visit the MCP Education and Resource Page
https://www.nmhealth.org/about/mcp/svcs/rpa/

MCP continually updates educational materials
(thank you to Andre Walker and the Comms Team)

Importantly, on the MCP Education and Resource Page:

- You can find all laws and regulations for the Medical Cannabis Program at www.nmhealth.org/gotmcp.
- Listed below are some quick "Do's and Don'ts":
  - **Do:** Track the effects of medical cannabis. Keep cannabis secure. Purchase cannabis from legal sources.
  - **Don't:** Transfer cannabis across state lines or into federal areas or federal offices. Use in public areas. Sell product to any person or entity. Drive while impaired.

Medical cannabis may be purchased from any licensed dispensary and is tax-free up to the 4251 unit rolling 90-day supply for patients. Patients may purchase cannabis in addition to the 90-day rolling supply but will not receive the tax-free benefit on these additional purchases.

**NOTE:** Take your patient ID card and your state ID to every visit. New Mexico residents can apply to become medical patients, regardless of age, however, anyone under the age of 18 must have a caregiver.

**SAFETY**
- Keep cannabis, and all other medications, away from children and pets.
- It is important that you buy your medical cannabis from a licensed dispensary in New Mexico. Dispensaries are required to test cannabis products.
- Transport and store your medical cannabis in the original dispensary packages.
- Keep your cannabis secure.
- Consume medical cannabis products someplace you feel safe and where you will not have to drive.
- If you use a courier to deliver your medical cannabis, ask for their ID and have your patient ID card ready to show them.
- New Mexico residents under 21 cannot purchase cannabis unless they are medical patients.
- Having a card may not protect you if your workplace has a drug-free policy and considers you to be in a safety sensitive position. Ask your employer to be sure.

Safe Storage

SAFELY STORING YOUR CANNABIS

Store all cannabis in child-safe containers

- It is always best to keep cannabis in child-resistant packaging.
- Make sure containers are re-sealed after use.
- A lock-box is a good way to make sure so you are the only person who can get to your cannabis.
- Store cannabis in a place that is out of sight to children.

Talk to your kids about cannabis in the home

- It is a way to keep cannabis in child-safe containers.
- Make sure containers are re-sealed after use.
- A lock-box is a good way to make sure so you are the only person who can get to your cannabis.
- Store cannabis in a place that is out of sight to children.

Keep labels on all cannabis products

- All legal cannabis products will have a label.
- Make sure the label is clear and visible.
- If you make your own cannabis products, be sure to label them.
- Keep all packaging and container inserts.
- Store cannabis in a place that is out of sight to children.

SAFE STORAGE YOUR CANNABIS

Store all cannabis in child-safe containers

- It is always best to keep cannabis in child-resistant packaging.
- Make sure containers are re-sealed after use.
- A lock-box is a good way to make sure so you are the only person who can get to your cannabis.
- Store cannabis in a place that is out of sight to children.

- Make sure the label is clear and visible.
- If you make your own cannabis products, be sure to label them.
- Keep all packaging and container inserts.
- Store cannabis in a place that is out of sight to children.
Pregnancy and When at Home

Cannabis use in Pregnancy and Breastfeeding for a healthy baby from infancy to adulthood

Cannabis During Pregnancy
Researchers are still learning about the effects of cannabis during pregnancy. Studies show that cannabis (marijuana) use during pregnancy may be harmful to the baby’s health and can cause problems like:
- Low birth weight
- Poor brain development
- Stillbirth
- Preterm delivery

The chemicals in marijuana (in particular, tetrahydrocannabinol or THC) pass through the placenta from your body into your baby’s body.

Cannabis for Morning Sickness
There is no evidence that suggests cannabis is helpful for morning sickness. If you are experiencing morning sickness, talk with your medical provider about other options.

Cannabis while Nursing
Chemicals from cannabis can be passed to your baby through breast milk. Little is known about the effects of cannabis on breastfed babies. To limit the potential risks to your baby, cannabis use while nursing should be avoided.

Cannabis: Toddlers to Adulthood
Scientists are still learning about the effects of cannabis on a developing brain. Studies suggest that cannabis use by mothers during pregnancy impacts the child’s attention, memory, problem-solving skills and behavior later in life. Learning or paying attention may be hard for the child as they grow.

Vapes and Edibles. The chemicals in any form of cannabis may be bad for your baby. This includes vapes and edible marijuana products, such as cookies, brownies, or candies.

Safely Storing Cannabis
As the popularity of edibles grows, it has become more common for kids to accidentally consume cannabis. Edibles are foods (usually baked goods or candy) that contain cannabis. They often look exactly like regular cookies, brownies, chocolate or gummi. If you keep cannabis edibles in your home, find a secure place to keep them.

Just like any drug, medication or household chemical, cannabis and edibles must be kept secure and out of reach. It is best to keep your cannabis in the original, child-resistant packing and locked in containers or cabinets.

Edibles
Toddlers and even children may not be able to distinguish between cannabis edibles and other sugary treats.

Dangers of Cannabis Smoke
Smoke from cannabis has many of the same toxic and cancer-causing chemicals found in tobacco smoke and contains some of those chemicals in higher amounts.

Second-hand cannabis smoke: Your infant inhales second-hand smoke containing THC and other harmful substances.

Third-hand cannabis smoke: Your infant comes into contact with ash and other residues on clothing, furniture, bedding, and bath liners.
