Respite care services allow the primary caregiver a limited leave of absence in order to reduce stress, accommodate caregiver illness, or meet a sudden family crisis or emergency. By permitting the caregiver a specific and limited break from the daily routine of providing care, burnout is reduced and the primary caregiver receives a source of support and encouragement to continue home care services. Respite may be provided in the follow locations: the Medically Fragile Waiver participant’s home or private place of residence, the private residence of a respite care provider or a specialized foster care home.
